

Our healthcare interiors team creates healing environments to improve the health and vitality of the communities they serve. From community clinics to advanced hospitals and research facilities, from sterile operating rooms and research laboratories to exam rooms and overnight stays, we strive to balance function and performance with beauty and grace. We focus on the patient experience. Our solutions for healthcare interiors are informed by research to improve health and wellbeing with compelling, efficient, and flexible solutions.

Our healthcare interiors team provides services for private practice, medical office buildings, acute ambulatory and critical care facilities, and specialized laboratory and research facilities.
