

Our K12 Education team creates environments that ignite curiosity and nurture innovation. Imaginative design plays an active role in teaching and learning and has a measurable impact on teacher and student performance. We create environments that embrace technology, foster collaboration, and promote inclusive learning communities. Our designs adapt to various learning styles to help ensure students find success. The interior of space provides a stimulating catalyst for success in an ever-changing world.

Furniture, fixtures, and equipment (FF&E) play an integral role in the learning environment. At t2 Designs, we work as part of your team to ensure an appropriate plan for FFE is put in place early and is funded throughout the project. We are highly skilled at designing, specifying and coordinating the bidding & installation of FFE for K12 institutions.

Our K12 Education team provides interior design services for public, private, and charter schools.
